The Computer Science program is composed of two specializations. The Computer Science (CS) Specialization includes the theoretical foundations of computer science and the study of algorithms, data structures, software engineering, computer architecture, and the concepts of programming languages.

The Computer Information Systems Specialization (CIS) provides the student with a foundation in information systems principles complemented by comprehensive instruction in principles of computer languages, problem solving, database concepts, and software engineering applications.

Contact the department for information concerning the certificate program.

PROGRAM REQUIREMENTS

In addition to general University requirements, students seeking the B.S. in Computer Science must meet the requirements listed below.

A minimum grade of “C-” is required for all courses in the major with a cumulative major GPA of 2.5 or higher.

Students are advised to check prerequisite requirements for all courses. Minimum grade requirements vary among departments.

Students should consult with their academic advisor for courses which may satisfy both the General Studies requirements and common prerequisites.

Electives in both the CS and CIS options may be chosen from the following list, provided the course is not a degree program requirement, and the student has all the specified prerequisites for the course:
