

Below is a list of companies in the Pensacola/Mobile area that we have identified which have traditionally hired chemists at all levels of education. It is not necessarily a complete list. Additional information about the companies often can be found on the website for the individual company or the Chamber of Commerce website for the respective cities (Pensacola, FL or Mobile, AL).

Historically, local companies advertise their employment vacancies via the local newspapers and employment agencies. National companies often advertise in *Chemical & Engineering News*, a publication of the American Chemical Society. However, many companies have gone to advertising solely on the company website. Thus, monitoring the company websites for job vacancies is advised for students seeking employment in the local job market. On the national level, Monster.com and Careers.com seem to be very useful for finding chemistry jobs in other parts of the country.
