

# Setup Instructions for ArgoAir Wireless Network Android 2.2

*University Guests: A username and password are required to use ArgoAir. Your UWF host can obtain a guest ArgoAir account from the ITS Help Desk or a Local Service Provider.*

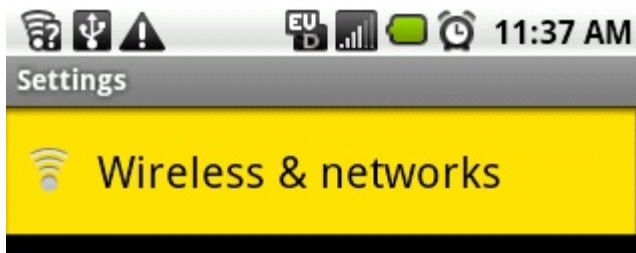

## From the Home screen

Press the Menu button and then select "Settings."

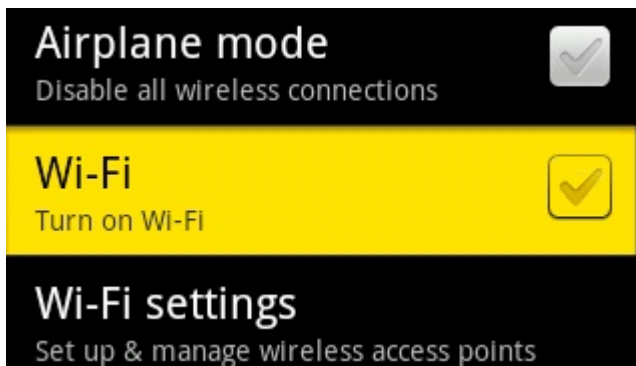

## On the next window

Select "Wireless & networks."

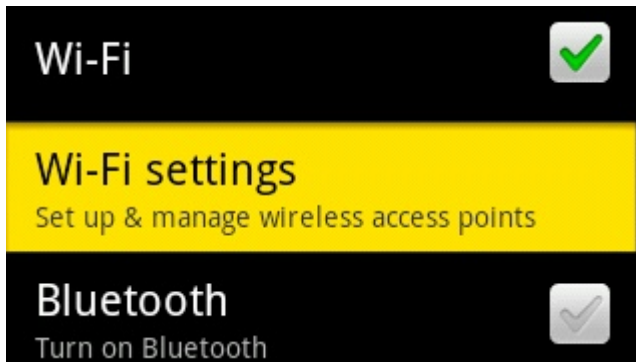

## If "Wi-Fi" is off

Select "Wi-Fi."

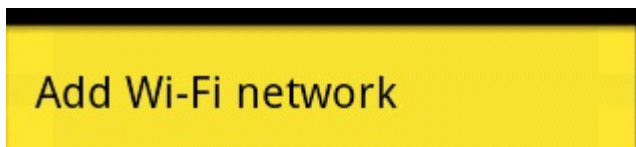

### Enter Wi-Fi settings

Select "Wi-Fi settings."

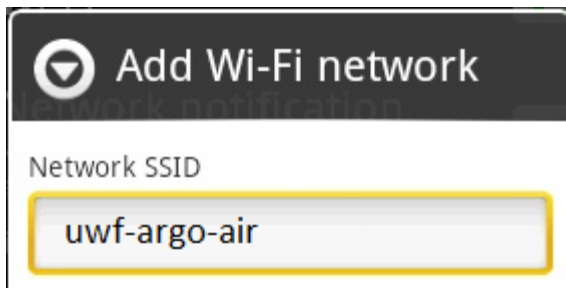

### Add Wi-Fi network

Scroll to the bottom of the screen and select "Add Wi-Fi network."

### Network SSID

Enter uwf-argo-air in the "Network SSID" field.

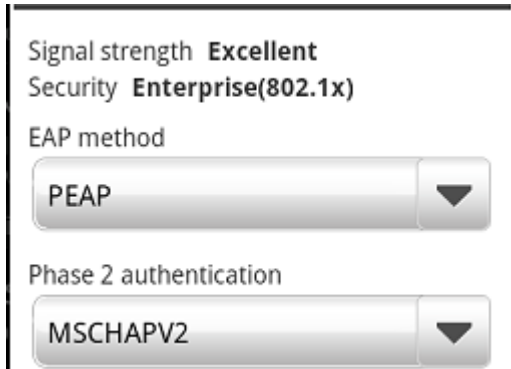

### Security

Select the "Security" drop-down menu and select either "802.1x Enterprise" or "802.1x EAP."

**EAP method**

Select the “EAP Method” drop-down menu and select “PEAP.”

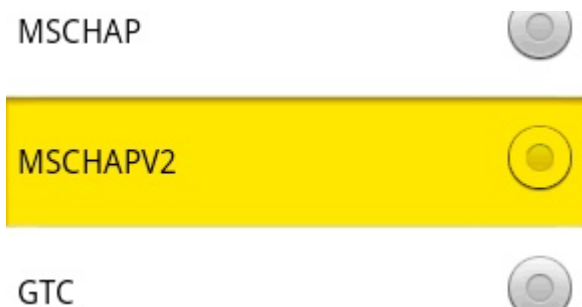

Signal strength **Excellent**  
Security **Enterprise(802.1x)**  
EAP method  
PEAP  
Phase 2 authentication  
MSCHAPV2

**Phase 2 authentication**

Select the “Phase 2 authentication” drop-down menu and select “MSCHAPV2.”

*Note: You may need to scroll down on the page to access “Phase 2 authentication.”*

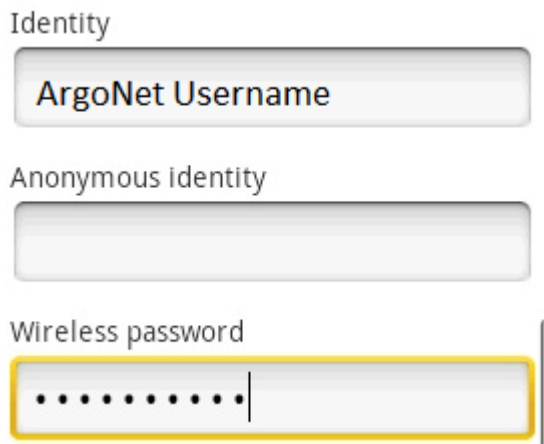

MSCHAP   
MSCHAPV2   
GTC

**Enter ArgoNet username**

Enter your ArgoNet username in the “Identity” field and your ArgoNet password in the “Wireless password” field.

*Note: You must scroll down on the page to access these fields.*

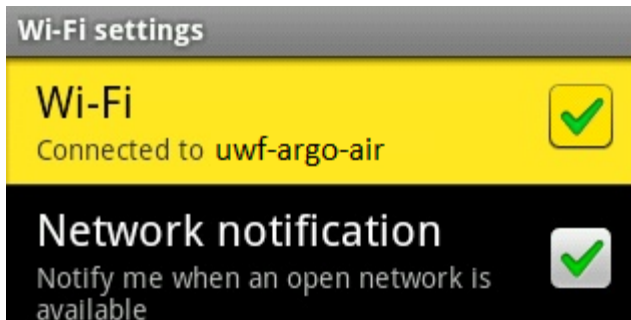

Identity  
ArgoNet Username  
Anonymous identity  
Wireless password  
.....

**Save settings**

Select the "Save" button.

**Confirm connection established**

If the steps were completed correctly, and you have a wireless signal, you should see the following:

**Verify the connection**

Open a browser and visit a website.
