Public Health Environmental Health

Student Learning Outcomes
Upon completion of the graduate certificate in Public Health Environmental Health, the graduate will be able to do the following:

1. Identify environmental hazards and diseases and be able to discuss how major environmental and occupational agents directly and indirectly impact human health, safety, and the environment.
2. Explain genetic, physiologic and psychosocial factors that affect susceptibility to adverse health outcomes following exposure to environmental hazards
3. Describe the process for evaluating and controlling environmental hazards
4. Evaluate a case study of a local environmental or historic bioterrorist issue using professional writing and communications skills
