

Criminology and Criminal Justice – Intelligence Analysis

Mission Statement

The Intelligence Analysis Certificate prepares students to work in a collaborative setting focused on protecting the homeland at the local, state and national levels. Students are introduced to intelligence collection methods, learn how to interpret large data sets and apply them to national security problems, and develop the skills necessary to present well developed, professional written and oral briefings.

Student Learning Outcomes

Upon completion of the Intelligence Analysis Undergraduate Certificate, the graduate will be able to do the following:

- Evaluate different sources of information to determine their utility in the analytic process.
- Summarize the importance of intelligence and the intelligence cycle in the national security arena.
- Develop open-source intelligence reports using writing styles unique to the intelligence community.
- Compare and contrast different kinds of intelligence (i.e., HUMINT, ELINT, SIGINT, MASINT, etc.), collection methods and when their use is appropriate.
- Demonstrate ethical behavior in academic and professional activities.
