Healthcare Providers:

Date: _____ Provider Name: _____ Physician PA ARNP RN

Signature: _____ License No./State _____

Per our clinical site agreements: if the Hepatitis B titer results are “negative” or “non-immune”, the student has two options:

Option 1: If the series was completed more than 1 year ago, they can get a Hepatitis B booster, and 30 days later have a new titer drawn; if the results of the titer are positive they are complete. If the titer is negative they must repeat the entire 3 part immunization series, wait the 30 days for a new titer to be drawn.

Option 2: If the series was completed in the past year, repeat the entire 3 part immunization series, wait 30 days for a new titer to be drawn. If result is negative see a provider for Hep B infection serology.
