

## OSINT Techniques and Analysis

UWF Florida Cybersecurity Training Program  
Offered by the University of West Florida Center for Cybersecurity

### Course Overview

**Course Dates:** June 2 - June 13, 2025

**Duration:** 2 weeks

**Estimated Time Commitment:** 7.5 hours per week

**Instructional Hours:** 15 contact hours

**Delivery Format:** Asynchronous online

**Target Audience:** IT and Cybersecurity practitioners

**Required Prerequisites / Background:** Basic understanding of cybersecurity principles. Familiarity with internet research and standard IT tools is recommended but not required.

**CEUs:** 1.5, **CPEs:** 18

**Course Instructor:**

Instructor	Email
Connar McCasland	cmccasland@uwf.edu

### Course Description

In today's interconnected world, Open Source Intelligence (OSINT) is a critical tool for security and risk management professionals to identify and mitigate potential threats. This 2-week course provides participants with the skills to transform publicly available data into actionable intelligence.

Through a combination of lectures, case studies, and hands-on labs, participants will develop practical skills in investigative techniques, data analysis, and risk mitigation strategies. They will learn how to uncover, analyze, and utilize publicly available information to identify and address potential threats, enabling them to protect their organization's environment.

By the end of this course, participants will have the practical skills to utilize OSINT tools and methodologies effectively, enabling them to protect their organization and proactively address potential vulnerabilities.
