Course Description

In this course, participants will learn and understand the intricacies of writing IT policies and procedures for an organization. Covering key governance, risk management, and compliance principles, the course delves into the intricacies of crafting policies that align with industry best practices and legal requirements. Participants will learn to articulate clear and concise policy objectives, define roles and responsibilities, and establish incident response and data protection procedures. Participants will take time to understand the dynamic landscape of technology, emerging cyber threats, and the evolving regulatory environment. Through practical exercises and case studies, participants will gain hands-on experience drafting policies that safeguard sensitive information and promote responsible and ethical use of technology across diverse organizational contexts.

This course uses a combination of lectures, discussions, and exercises in a synchronous (live online instruction) environment via Zoom.
