Academic Advising Assessment Plan
2017-18

ADVISING CENTER
COLLEGE OF EDUCATION & PROFESSIONAL STUDIES

UNIVERSITY of WEST FLORIDA
In alignment with The Global Community for Academic Advising (NACADA) and the Council for the Advancement of Standards in Higher Education (CAS), this academic advising annual assessment plan intends to articulate an ongoing cycle of assessment of unit activities, both at the undergraduate and graduate levels. CAS explained academic advising programs must:

- Specify programmatic goals and intended outcomes
- Identify student learning and development outcomes
- Develop manageable processes for gathering, interpreting, and evaluating data
- Employ multiple measures and methods
- Interpret and use assessment results to demonstrate accountability
- Report aggregated results to respondent groups and stakeholders
- Use assessment results to inform planning and decision-making
- Assess effectiveness and implemented changes
- Provide evidence of improvement and programs and services

NACADA provides a concept of academic advising, as well as a set of core values that guided the development of this assessment plan and direction of this academic advising program. The NACADA concept preamble states:

Academic advising is integral to fulfilling the teaching and learning mission of higher education. Through academic advising, students learn to become members of their higher education community, to think critically about their roles and responsibilities as students, and to prepare to be educated citizens of a democratic society and a global community. Academic advising engages students beyond their own world views, while acknowledging their individual characteristics, values, and motivations as they enter, move through, and exit the institution. Regardless of the diversity of our institutions, our students, our advisors, and our organizational structures, academic advising has three components: curriculum, pedagogy, and student learning outcomes.

NACADA provides a statement of core values to affirm the importance of advising within the academy and acknowledge the impact advising interactions can have on individuals, institutions, and society. The core values are not in place to dictate a method of advising, rather they are the reference points advisors use to consider their individual philosophies, strengths, and opportunities for professional growth. Core values explain advisors are responsible:

- To the individuals they advise
- To their institutions
- For involving others, when appropriate, in the advising process
- To higher education
- To their academic community
- For their professional practices and for themselves personally
