

## MSN Aggregate Program Outcomes

1. Integrate scientific findings from nursing, biopsychosocial fields, global initiatives and other sciences to improve patient care across the lifespan and in diverse settings.
2. Use methods, technology and other tools, performance measures, and standards related to quality improvement and safety within organizations.
3. Utilize organizational and systems leadership to promote decisions directed at achieving high quality, safe, and cost efficient patient care.
4. Translate and integrate scholarship, educational strategies, and evidence into practice settings to optimize quality patient outcomes.
5. Integrate broad organizations, client-centers, and culturally appropriate concepts to provide evidence-based clinical prevention, care and services to individuals, families, and populations.
6. Utilize patient-centered communication technologies to integrate, deliver and enhance health care across the lifespan.
7. Collaborate as a member and leader of inter-professional teams to intervene at the system level through policy development processes and employing advocacy strategies to influence health, education and practice.
8. Provide care and mentoring in a compassionate manner that respects, protects, and enhances spiritual integrity, human dignity, and cultural diversity.
