Career & Technical Education

Student Learning Outcomes
Upon completion of the undergraduate certificate in Career & Technical Education, the graduate will be able to do the following:

1. Apply career and technical education philosophy to determine objectives, construct course materials and develop assessments in Career and Technical Education (CTE) programs.
2. Describe the role of career and technical education in public schools and determine how the emphasis on restructuring schools impacts CTE.
3. Identify the role CTE has in educating special needs learners and analyze current technology available to assist special needs students and evaluate the accessibility of given facilities and programs to special needs students.
4. Describe or demonstrate major methods or techniques of teaching that are appropriate for CTE programs in various occupations.
